

ACCURA[®] Bulk Management. Your gas consumption at a glance – online.

General ACCURA[®] Bulk Management is an online service that lets you check and keep track of your liquid gas requirements. Especially in combination with SECCURA[®] Bulk Management, our automatic gas supply solution for tanks, you can easily monitor your gas levels, consumption patterns and delivery notes for every tank and location – any time, anywhere. Comprehensive statistics, period-on-period comparisons and regular email reports make light work of analysing and planning your gas needs.

Services at a glance

- Online overview of real-time tank levels and consumption data per tank and location
- Comparison of gas consumption patterns across different production periods, locations and processes
- Overview of delivery note data and quantities supplied
- Automatic emails with defined analyses on weekly, monthly or annual basis
- Access using standard web browser using personal user ID and password – no special software required

Benefits to you

- Efficiency gains with support for planning, controlling and reporting processes; easy creation of safety and environmental reports (ISO 9001) on gas supply, with comprehensive analyses of tank levels, delivery volumes and consumption levels
- Increased safety and cost savings through early detection of leakages
- Cost savings through increased process efficiencies enabled by comparative analysis of consumption across different production periods, sites and processes

Target customers

- Companies
- that want to increase gas supply efficiency
 - for which gases are a critical production factor
 - that use gases at a number of locations

Other services

SECCURA® Bulk Management – Automatic refilling of tanks based on a remote monitoring service delivered by Linde Gas
 SECCURA® Cylinder Management – Remote monitoring of gas levels and automatic replenishment of cylinders, connecting cylinders/bundles included – all taken care of by Linde Gas
